

# National Bench Co.

## 1-800-696-2047

### Bench Assembly

Before you begin Read directions and follow each step. **Leave all screws loose until all nuts and screws are installed** - this allows some flexibility in the bench. After everything is installed be sure to tighten everything. **If the bench is loose it will break.**

#### Assemble the base

1. Attach one short rail (side C) and two long rails (side A and B) with corner brackets.
2. Insert bottom into slot.
3. Attach short rail (side D)

#### To assemble the legs and brace:

1. Attach one leg. Leave nut loose
2. Place bench on a level surface.
3. Tighten all Screws and Leg nuts

#### Assemble top

1. Attach hinges to the long rail with the pre drilled hinge holes.
2. Attach top to hinges.
3. Attach lid support using the pre drilled holes on the inside of the top.
4. Attach lid support to the hole on the inside of the short rail using the felt washers, one on either side of the lid support.
